# The Song

Let's say you're a new artist looking to make a name for yourself in Nashville.

If you write your own songs - GREAT. That's a big plus.

If not, it's ok. ***This is not a problem.*** Many popular artists never write the songs they sing. The first thing you need to do is find some great new songs to record.

***But how do you go about doing that?***

# The Label

***That's where we come in!***

*The Orchard, a Sony Music Entertainment company*

With nearly 60 years in the music industry, **Lamon Records Nashville** is a well respected major indie record label with a solid international distribution network through Sony Music Entertainment.

And we have access to, and relationships with, major music publishing companies and hit songwriters willing to pitch us songs for you to consider and record.

# The Producer

**Next, you need a producer to help arrange your original songs**, or enhance the ones you've chosen from our publisher pitched songs to record.

The producer will know engineers and musicians in town that will be the perfect fit for the style of your music you want to record. They'll be conscious of the need to develop a **unique sound** that separates your record from the 50,000 other recordings made each year.

# Meet Dave Moody
